

We strive for quality and customer satisfaction above all else. We take pride in delivering a superior product. For over twenty five years our company has manufactured doors that are not only beautiful but built to last.

TROY CORNERS DOOR COMPANY

EST. 1980

Troy Corners is a door millwork company. We manufacture custom doors, sidelights and transoms. We do not sell doors or windows made by other companies.

Manufacturer of Stile & Rail Doors

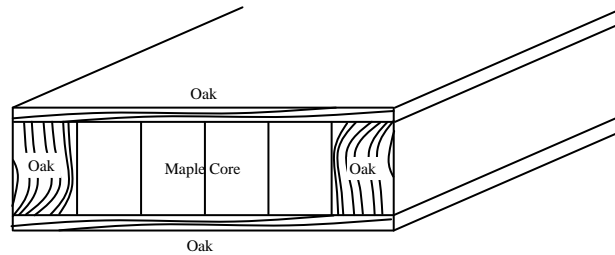

Oversized and odd sized doors, round top doors, and custom moldings are our specialty. Doors can be manufactured to your exact specifications. We also have experience recreating exact duplicate doors for historical projects.

DOOR CONSTRUCTION:

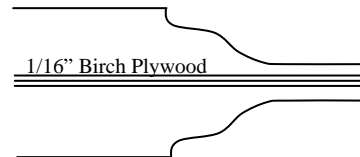

- A two part exterior epoxy adhesive for wood is used for all gluing during the door construction.
- Stiles on all doors, and sometimes rails, are built using a maple core.

- Matching lumber boards are sawn in half and sanded to 1/4" thickness and glued to the core.

- Exterior raised panels consist of a three layer construction, two pieces of wood and one piece of birch plywood.

- The entire door is sanded. Additional time is spent sanding each door with a half sheet vibration sander and using cross lighting to check the surface for scratches.

- **Hardwood Doors**
